

INTEGRATION OF A NEW CHILD

The child will visit the facility during registration with Mom and Dad, this will help with the integration process, everyone will be able to see the place and meet the staff and other children.

During registration, the child can choose to stay with the parent in the office or to stay in the room with their new educator and their new friends.

During registration a discussion between the director concerning registration will be done to see what would be best for the child (ex: half days)

Based on the child's reaction, an adjustment can be made according to the child's needs, a discussion at that point will be done between the educator and parent.

The director may suggest other alternatives, if need be.
