

VARIOUS TESTS AND INSPECTIONS DONE AT THE ECC

The ECC is required to verify various elements in each of its facilities according to their specific characteristics. Here is a summary:

Water Tests in Luskville: (private well) Four different water tests are carried out throughout the year.

- Bacteriological: 1st is twice a month,
- Turbidity: 2nd is once a month,
- Nitrite/Nitrate: 3rd is once every three months,
- Various metal test: 4th is once a year.

Shawville Air Quality Tests: (past positive radon test) Radon in the air is tested once every five years. A system is operational at all times to ensure the quality of the air. The system check is done on a weekly basis.

Outdoor play equipment: An external consultant inspects the outdoor play area once every three years. Also, an employee does a daily written inspection.

Kitchen: A MAPAQ inspection is done once every three years.

License renewal (ECC): The Ministry conducts an inspection of the facilities once every five years (minimum).

Car seat verification: In collaboration with the police forces in our region, a car seat verification clinic is offered free of charge to daycare parents once a year when the children leave at the end of the day. A great opportunity to make sure your seat is safe for your child.
